

DEVOPS TRANSFORMATION

Break down silos and reimagine enterprise-wide software deployment to save time and money with 27Global's DevOps Transformation offering.

What is DevOps?

DevOps is a set of practices that automates processes and encourages coordination across all teams within a business, not just the software development and operations teams. With a strong DevOps culture, your company can build, test and release software more quickly and reliably, with a greater focus on customer needs.

Benefits of DevOps

Clients of all sizes in cities across the U.S. leverage 27Global's DevOps expertise to:

- Improve software quality
- Detect software defects as soon as they appear
- Speed software products to market
- Lower costs
- Align Dev & Ops functions for greater efficiency, collaboration & visibility
- Implement core capabilities, including:
 - Infrastructure-as-Code
 - CI/CD
 - Continuous monitoring & measurement
- Eliminate unplanned work & urgent firefighting on projects with automation
- Improve customer experience
- Increase employee satisfaction

DEVOPS TRANSFORMATION

In a DevOps structure, elite performers had:

208x

MORE FREQUENT
CODE
DEPLOYMENTS

106x

FASTER LEAD
TIME FROM
CODE COMMIT
TO DEPLOY

2,604x

FASTER MEAN
TIME TO
RECOVER
DOWNTIME

7x

LOWER CHANGE
FAILURE RATE

- Accelerate State of DevOps

Our Process

At 27Global, our DevOps experts evaluate, implement and facilitate adoption of DevOps principles throughout your development and infrastructure organizations. We define and guide strategy for infrastructure and code deployment automation, process monitoring and measurement, collaboration, management visibility and creating a sustainable DevOps culture.

Why 27Global?

We've baked DevOps principles into our business and client engagements. We've learned what works and what doesn't, producing proven solutions for routine tasks like configuration management, deployment or release orchestration while continuously working toward new certifications and tools to stay abreast of technology and market trends.

Release With Peace of Mind

We're reshaping how companies implement and maintain business-critical software solutions. Using continuous automation and regression testing, and capitalizing on agile and scrum expertise, we help organize your team's resources effectively, improve quality, achieve rapid market feedback and dramatically cut costs. Let 27Global help you innovate and release with confidence.
